

New World Hotel Case Study

Since August 2023, Green Connect and New World Hotel have kicked off our contract to collect all the end-of-date waste from the hotel and provide suitable treatment solutions for each waste category. The average collected volume is up to one ton, a notable waste amount saved from being dumped in landfills.

GET TO KNOW HOW WE WORK!

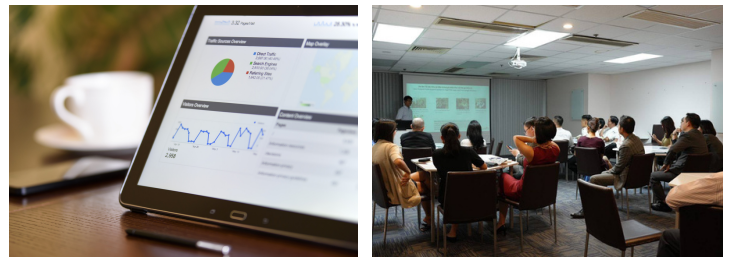

1 ONE - STOP SHOP SOLUTION

- We train and provide booklet to help the whole system classify waste into specific categories.
- Wastes are classified into organic, glass, aluminium, cardboard, used cooking oil for different treatment processes.

2 TRANSPARENCY & DATA REPORT

- Waste volume is tracked daily according to different waste categories.
- Collected data can be organized and managed for monthly and annual reports.
- Enhance the company's public image by contributing to Net Zero Commitment by 2050.

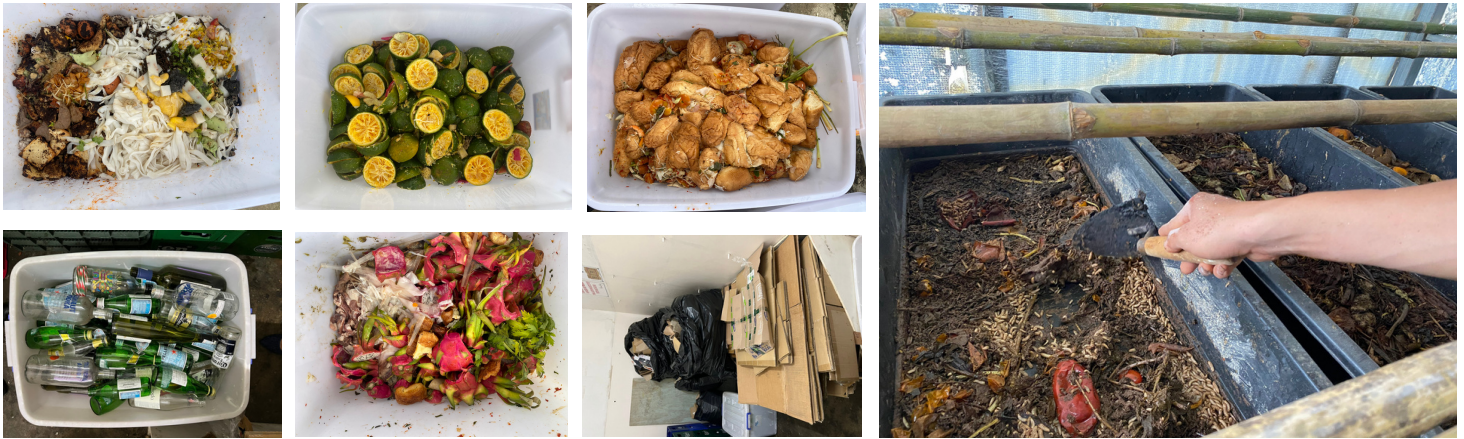

3 TRACEABILITY & EVENTS

- Organizing field trip for company staff to visit Green Connect factory in which all the waste categories are managed.
- Attending 3 Moc experiential class organized by Green Connect with the attempt to promote Circular Economy awareness and understanding.
